

BENTLEY'S MUNICIPAL LICENSE SUBSCRIPTIONSM

UNLIMITED SOFTWARE FOR A FIXED ANNUAL FEE

Bentley's Municipal License SubscriptionSM affords you more than just the best software solutions for the design and management of government infrastructure, it offers a revolutionary pricing structure coupled with a true subscription service.

Bentley local government solutions – Giving you the freedom to create a better world.

Municipal License Subscription (MLS)

Bentley offers a ground-breaking approach to acquiring and managing software infrastructure that offers local governments a better way to optimize critical resources - people, software, budgets - and plan efficient operations that support your communities more effectively. What's more, it will make software costs easier to predict so procurement headaches will simply disappear.

Now your department, along with the many other agencies and departments within your municipality, can have any-time access to the world's leading infrastructure software through a simple, fixed-rate subscription based solely on the size of the population in your administrative area.

Appropriately priced for each community, the Municipal License Subscription provides continuous, unrestricted access to a comprehensive portfolio of Bentley's products for all types of GIS and infrastructure engineering applications, including:

- Mapping
- Land management
- Web publishing
- Geospatial information management
- Facilities management
- Civil engineering
- Architecture
- Public works
- Communications networks (design and management)
- Production plotting
- Water/sewer/drainage networks
- Modeling and visualization
- Electrical and gas networks design
- And more...

Plus, all Bentley products work efficiently with the systems you already have in place through our open architecture and connector system. Bentley supports all the common file formats that you are using, including DWG, Shapefiles, PDF, and more, making workflow and data sharing straightforward.

And with our support of enterprise spatial databases such as Oracle Spatial and our federated data management capability available through the Bentley Geospatial Server, Bentley truly advances GIS for infrastructure.

Here are five reasons to say YES to Municipal License Subscription

1. Access to a comprehensive portfolio of Bentley software products at any time
2. FREE anytime software upgrades
3. Any time, any place training (with the ETS option)
4. Around the clock technical support
5. Hassle-free software administration

Municipal License Subscription Quick Facts

- Q.** Who qualifies for the program?
A. The Municipal License Subscription program is open to any incorporated local or regional government.

- Q.** How is the subscription fee determined?
A. The annual subscription fee is based on population, not the quantity of software deployed or on the number of users/seats.
- Q.** What about training costs?
A. An Enterprise Training SubscriptionSM can be added for 30% of the Municipal License Subscription, or a minimum fee of \$10,000* annually whichever is the greater.
- Q.** We are currently SELECT[®] subscribers. Do we need both subscriptions?
A. Current SELECT subscribers receive a full credit for their SELECT fees when upgrading to the Municipal License Subscription.
- Q.** Which local government organizations have subscribed to MLS?
A. A partial customer list includes the cities of Helsinki, Vantaa, Edmonton, Calgary, Toronto, Montreal, Arnhem, Magdeburg, Overbetuwe, Kotka, Nynäshamn, Helsingør, Franklin, Alpena, and Lakeland.

*USA only - prices may vary in other territories.

Available software

- MicroStation[®]
- Bentley[®] Map[™]
- Bentley[®] Cadastre[™]
- Bentley[®] Descartes[™]
- Bentley[®] I/RAS B[™]
- Bentley[®] Geo Web Publisher[™]
- Bentley[®] PowerMap[™]
- Bentley[®] PowerMap Field[™]
- Bentley[®] Water[™] and Bentley[®] Wastewater[™]
- Bentley[®] Electric[™]
- Bentley[®] Expert Designer[™]
- Complete Haestad Methods[®] product line
- Bentley[®] Geospatial Server[™]
- Bentley[®] ProjectWise[®] Connectors for ArcGIS software and Oracle
- Entire civil engineering suite
- Building and plant software
- Bentley[®] Fiber[™], Bentley[®] Coax[™], Bentley[®] Copper[™] and Bentley Inside Plant[™]
- And much more...
