

*"With the available qualified talent pool small and our needs great, I was happy to find that Bentley Systems and Be Careers Network were interested, responsive, and committed to helping us identify candidates for our MicroStation® needs. They really are an asset to our Human Resources team."*

*Daniel M. Kaseman  
Co-Founder, Kaseman, LLC*

## BE CAREERS NETWORK

SOFTWARE, TRAINING, AND SUPPORT FOR EDUCATORS, STUDENTS, AND AEC/GEOSPATIAL PROFESSIONALS

As the world's leading company dedicated to providing comprehensive software for the infrastructure that sustains our world, Bentley is committed to helping students and educators access the same professional-grade software and training used by the world's leading design and engineering firms.

### SUSTAINING THE PROFESSION, TOGETHER

Never has the importance of infrastructure in all its forms been more evident than it is today. At the same time design and engineering firms are demanding that the next generation of engineers and architects be prepared to enter the workforce equipped with in-depth knowledge of the technology and tools that will be used to design, build, and operate the infrastructure of tomorrow.

That's where Bentley's Be® Careers Network comes in. Be Careers Network not only makes that access to software and training possible and affordable, but we also go the extra step by connecting new graduates with firms seeking the skills the program develops.

### BE CAREERS NETWORK'S VALUE

The Be Careers Network offers:

- **A Comprehensive Software Suite** – cost-effective, encompassing the full range of infrastructure disciplines.
- **Blended Learning** – Bentley's technology training via online self-service learning allows professors to focus on core concepts.
- **Professional Networking** – the Be Communities networking website allows students, educators, and professionals to network and interact.

**Students** gain technology foundation for "job-readiness." **Educators** and faculty continue to focus on the core discipline. **Bentley users** benefit from an enhanced quality graduate pool, while reducing recruiting and training costs.

*“Bentley Systems has been a valuable partner assuring the college’s ability to prepare our students for success in the design and drafting industries. The Be Careers Network team is reliable, prompt, and continuously supportive of our curriculum and academic initiatives.”*

*Tom Barrett, CAD Coordinator, Community College of Baltimore County*

**HOW WILL BE CAREERS NETWORK BENEFIT YOU?**

As an **educator** seeking more efficient use of your time, the Be Careers Network program offers a blended learning approach that provides the technical training students require, allowing you more time to focus on teaching core theoretical concepts. Educator-developed curricula and training guides are also available to help you design and customize your courses.

**Students** gain access to the same software (in the lab and on their personal computers) and training as today’s

architecture, engineering, construction, and geospatial organizations. The Be Careers Network offers resources to network with real professionals and graduate with both an understanding of core concepts and technology skills that provide a competitive edge when it is time for job placement.

**Bentley users** gain access to a pool of qualified graduates, equipped with the training needed to be productive on day one. Be Careers Network partners with organizations to ensure there is support within the schools and disciplines where they recruit and deliver graduates ready to join the workforce.

WHAT’S IN IT FOR ME?		FOR THE STUDENT
<b>Software</b>	Comprehensive and economical software subscription options are offered based on the school’s needs and requirements.	<ul style="list-style-type: none"> <li>• Learn the same software industry professionals use every day</li> <li>• Run software on personal computers with unlimited home-use licensing</li> </ul>
<b>Training</b>	24-by-7 self-serve online training via the Bentley LEARN™ Server*; product webinars and video demos, educator-developed training guides and curricula	<ul style="list-style-type: none"> <li>• Train on the same software used by 90% of the ENR Top 500 Design Firms</li> <li>• Receive anytime access to online training</li> </ul>
<b>Professional Development</b>	Be Communities* networking website, Resume Center, Academic Competitions	<ul style="list-style-type: none"> <li>• Access professional networking via the Be Communities* networking website—students, educators, and professionals interact in forums, blogs, a wiki, and more</li> <li>• Receive scholarships and grants through academic competitions</li> <li>• Gain job placement via the Resume Center</li> </ul>
<b>Program Support</b>	24-by-7 technical support, direct interaction, and communication with the Be Careers Network team	<ul style="list-style-type: none"> <li>• Receive support through school administrator or via the Be Communities website’s forums and wiki</li> </ul>

## ABOUT BENTLEY

Bentley Systems, Incorporated is the global leader dedicated to providing comprehensive software solutions for sustaining infrastructure. Architects, engineers, constructors, and owner-operators are indispensable in improving our world and our quality of life; the company's mission is to improve the performance of their projects and of the assets they design, build, and operate. Bentley sustains the infrastructure professions by helping to leverage information technology, learning, best practices, and global collaboration – and by promoting careers devoted to this crucial work.

## BE CAREERS NETWORK SOFTWARE WILL PREPARE YOU FOR A CAREER IN...

<b>Architecture</b>	Bentley's building solutions serve architects, engineers, contractors, and owners embracing and benefiting from Building Information Modeling (BIM), parametric design, computational design, integrated practice, and sustainability.
<b>Structural Engineering</b>	Bentley's flexible and scalable structural products promote seamless workflow of analysis, design, detailing, documentation, and BIM data for building, plant, and civil applications. Bentley's structural products handle reinforced concrete, post-tensioned concrete, steel, wood, cold-formed steel, aluminum, and masonry.
<b>Civil Engineering</b>	Bentley's civil engineering products serve planners, surveyors, civil engineers, construction contractors, and owner-operators responsible for developing road, rail, and site infrastructure. Bentley's civil engineering products are used worldwide for roads and bridges, sites, transit and rail systems, urban design and planning, airports and seaports, as well as water and drainage projects.
<b>Industrial Plant Design and Operation</b>	Serving process plant owner-operators and their engineering and procurement contractors, Bentley's plant software offers conceptual design, engineering and analysis, operations, maintenance, and restoration of plants, as well as mining, metals, and related material-resource operations globally.
<b>Geomatics, GIS, &amp; Mapping</b>	Bentley geospatial products are used to plan, map, engineer, and operate infrastructure networks of electric and gas utilities, water utilities, government agencies, communications service providers, mapping organizations, and consulting engineering firms.
<b>Water and Hydraulic Engineering</b>	Used for building and operating water, wastewater, and stormwater infrastructure, Bentley water and wastewater solutions empower mapping and data management, information sharing and collaboration, hydraulic simulation and analysis, design and construction documentation, field engineering and inspection, and operations and maintenance.

## BE COMMUNITIES—ONLINE PROFESSIONAL NETWORKING

The Be Communities networking website is where the world's infrastructure communities come together to connect, communicate, and learn from each other. Students and educators interact with AEC and geospatial professionals as well as Bentley colleagues to get answers to important questions and find out the latest news in the world of design and engineering.

Be Communities makes it easy to find information and share knowledge via forums, blogs, a wiki, and various resource galleries. Explore the many resources directly offered to the academic community via the Be Careers Network Lobby. Gain immediate access to everything from free software to a resume center for graduates to seek job placement. <http://communities.bentley.com/be/BeCareers.aspx>

## BENTLEY LEARN SERVER—ANYTIME, ANYPLACE LEARNING

The Bentley LEARN Server is the nexus of all training activities provided and tracked by the Bentley Institute. It supports instructor-led (scheduled distance learning) as well as self-paced (OnDemand eLearning lectures and hands-on) courses. Each time a course is completed, Learning Units are earned, tracked by the Bentley LEARN Server, and recorded on the learner's Professional Training Transcript.

Bentley develops and delivers comprehensive training for professionals through the Bentley Institute, and a complete learning program for students and educators through Be Careers Network. Access to the Bentley LEARN Server delivers the convenience of anytime, anyplace learning.
