

# DESIGNING FUTURE CITIES

The ministry of science and technology and Bentley Systems declared the project designed by students of Manava Bharati India International School, Panchsheel, as the best in the 2008-2009 Future Cities India 2020 competition. This year's challenge centred on Indian Railways' plans to refurbish the country's aging railway stations into world-class facilities. Kapil Sibal, the union minister for science and technology and earth sciences, said: "By exposing young minds to engineering and design, we are grooming the next generation of infrastructure professionals, and giving them an opportunity to contribute to society." Members of the winning team included Harkeerat Singh, Sambit Ghosh, Ujjawal Gupta and Shwetank Chaudhry who were awarded scholarships and trophies
