

## Structural Engineer for Plant Design Passport Subscription

Use the tools, training and manufacturer's content included to help you analyze, design, document and detail industrial plant models. Perform advanced analysis and speed integrated workflows with structural engineers, detailers and fabricators to reduce errors and improve quality control. Explore the complete collection of Passport Subscription offerings to learn how each key deliverable contributes to your project success.

### Subscription Advantages:

With a Passport Subscription, there are three key advantages:

- **Annual Subscription model** is the affordable alternative to buying several mission-critical software products for a named user. By removing all software purchase barriers, Structural Engineers can equip themselves with the right software products to tackle plant design project work.
- **Discipline-specific Software Portfolios** help users overcome the challenges associated when they force-fit generic software products for specialist project work. This Passport Subscription delivers all the infrastructure software required by Structural Engineers to complete plant design project work.
- **Unlimited Access to Product Training**, technical support and software upgrades empowers Structural Engineers to skill-up quickly, sustain productivity, and develop their competitive edge by using the latest software products to successfully deliver plant design project work.

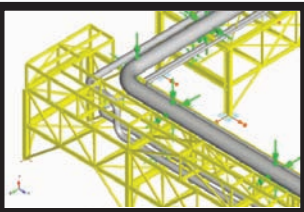

### Subscription Benefits:

With a Passport Subscription, everyone benefits.

**Structural Engineers** are equipped with the right mix of software for their plant design work. Each user can enjoy unlimited access to live training and OnDemand eLearning all from the convenience of their desk. This accelerates time to productivity and helps to keep projects on schedule.

**Engineering Firms** realize financial savings by eliminating software procurement and training costs. Firms are rewarded with a more capable team to maintain a competitive edge. And teams can also more easily collaborate when they subscribe to the same software mix for project execution.

**Project Clients** can be rewarded with higher quality projects that are delivered in less time and for a lower cost. Clients can also be assured that their project teams are collaborating smoothly to sustain and extend the value of project information created and shared.

### Software At A Glance:

The Structural Engineer for Plant Design Passport Subscription includes the following software and licenses: STAAD.Pro V8i, STAAD.Pro Advanced Analysis Module, STAAD.Foundation V8i, ProSteel Professional V8i, RAM Connection V8i, ProjectWise Passport.

## Structural Engineer for Plant Design Passport Subscription Offerings

Use the tools, training and manufacturer's content included to help you analyze, design, document and detail industrial plant models. Perform advanced analysis and speed integrated workflows with structural engineers, detailers and fabricators to reduce errors to improve quality control. Explore the complete collection of Passport Subscription offerings to learn how each key deliverable contributes to your project success.

Offerings	Key Deliverables	Benefits
<b>Annual Subscription</b>	<b>All Passport Subscription offerings for a low start-up cost.</b>	
Single Annual Fee	Software, training, support, upgrades and manufacturer's content.	Eliminate purchase costs.
Personal Subscription Access	Named-user access to all offerings for discipline specific work.	High user ROI.
<b>Software Portfolio</b>	<b>Advance levels of practice through information modeling with integrated software.</b>	
STAAD.Pro® V8i	Flexible modeling software for design and analysis of most structures or structural elements.	Save time using more streamlined modeling workflows.
STAAD.Pro Advanced Analysis Module	Software module to add advanced analysis functionality including Advanced Solver, Geometric Linear Analysis, Additional Meshing Push-over Analysis, Steady State Analysis and Buckling Load Analysis.	Produce more accurate models.
STAAD®.foundation V8i	Foundation design software including isolated footings, combined footings, strip footings, pile caps and mat foundations.	Save on design time and costs.
ProSteel® Professional V8i	Structural steel detailing and fabrication software for 3D modeling, drawing production and material management; includes the ability to add third party or your own manufacturer's content.	Save time with more flexible data modeling processes.
RAM™ Connection V8i	Steel connection design software; includes the ability to add your own manufacturer's content.	Check or design connections in seconds.
Structural Synchronizer V8i	A shared dynamic repository for all structural content including visualization and revision history to support Integrated Structural Modeling.	Maximize the interoperability of structural information among Bentley products.
Structural Dashboard V8i	A single interface for Bentley products that supports Integrated Structural Modeling by managing project data and workflow in a completely integrated dashboard.	Maximize the interoperability of structural information among Bentley products.
ProjectWise® Passport	The named-user license for ProjectWise Navigator, ProjectWise i-model Composer, and ProjectWise InterPlot Organizer.	Lower the software cost of collaboration.
ProjectWise Navigator V8i	Dynamic collaboration software for iterative project review and analysis of information contained in i-models.	Improve project insight to avoid on-site errors.
ProjectWise i-model Composer V8i	Standalone desktop software for producing multi-discipline i-models from multiple software sources.	Unlock the value of multi-discipline information.
ProjectWise InterPlot Organizer V8i	Desktop software to produce intelligent PDFs from CAD and Office documents.	Improve quality of project deliverables.
<b>Product Training</b>	<b>Learn new software with unlimited access to Live Training and OnDemand eLearning.</b>	
Live Training	Hands-on training courses delivered via a virtual classroom.	Eliminate travel-related training cost.
OnDemand eLearning	Lectures and courses accessible on your own schedule.	Eliminate wait-time for learning needs.
<b>Software Support</b>	<b>Get help when needed most with 24/7/365 self-service and assisted SELECTsupport.</b>	
Assisted Support	Your choice of assisted chat, phone or remote desktop support.	Maintain high productivity.
Self Service Support Center	Online knowledge bases, solution libraries, how-tos and FAQs.	Find solutions faster.
Electronic Service Ticket Manager	Service ticket creation, status and next steps available online.	Maintain high user satisfaction.
Escalation Management	Subject matter experts with the knowledge to solve any issue.	Shorten time-to-resolution.
Be Communities	Web-based knowledge-sharing with a global user community.	Find solutions faster.
Service Level Agreement	Qualitative response to Service Tickets in less than 4 hours.	Reduce downtime.
<b>Software Upgrades</b>	<b>Upgrade software in accordance with project needs in line with your preferred schedule.</b>	
Unlimited Software Upgrades	Upgrade to new releases as often as you like during the subscription.	Upgrade at no cost.
SELECTseries Software Updates	Productivity-enhancing, features and updates.	Increase competitive edge.
Access Upgrades Anytime	Download and install software according to project schedules.	Avoid project disruption.
